

eyeOS 2.0

With a unique design and many new possibilities, eyeOS 2.0 wants to be a perfect combination of aesthetics and functionality that will lift a new dimension in the world of Cloud Computing. The main focus of this new version is to provide a better web desktop for real people and easy teamwork. It is released under the Open Source license Affero GNU Public License version 3 (AGPL3). Basically, this means that you are free to copy, distribute and modify eyeos as long as you make all your modifications available for download.

New Applications

- eyeDocs
- eyeSpreadsheets
- eyeCalender
- eyeMail
- eyeFiles....

Features

- The innovation of eyeDocs 2 has been centered in its collaborative mode, which allows more than one user work on the same document at the same time.
- The file manager is the most important application in a web desktop. eyeFiles 2 is the eyeOS 2.0 file manager.
- Behind the appearance of a traditional calendar, the calendar of eyeOS 2.0 contains many new features to help you organize your tasks.
